

Field Technician Hazardous Materials/Indoor Environmental Quality Sudbury, ON

Today is the day to boost your career! Pinchin is seeking a Field Technician offering a 6-month contract with opportunity to become FT to join our Hazardous Materials and Indoor Environmental Quality team in our Sudbury office.

Reporting to the Project Manager, the Field Technician will conduct effective worker exposure and workplace monitoring, safety inspections and audits. You will assist in developing various types of hygiene, health and safety documentation, prepare technical reports and liaise with clients to ensure their needs and goals are met.

A Day in the life of a Field Technician at Pinchin:

- Complete assessments for mould, indoor air quality (IAQ), industrial hygiene, designated substances, and other hazardous materials
- Conduct interviews with clients regarding building history and site-specific client concerns
- Perform inspections and evaluating building systems
- Assess building damages related to floods, water losses, smoke, and fire
- Assist clients following flood and loss emergencies to get buildings dried, cleaned, or remediated and operational
- Collect mould and bacteria samples
- Identify and sampling suspect asbestos, lead, and PCB-containing materials
- Prepare detailed reports documenting findings and providing recommendations to address IAQ and hazardous materials concerns
- Inspect abatement and restoration contractors undertaking mould, asbestos and other hazardous materials remediation work to document that the work has been properly completed
- Collect and analyze Phase Contract Microscope (PCM) asbestos air samples
- Perform hazardous building materials assessments, including designated substances
- Prepare reports and drawings detailing the findings and recommendations
- Complete on-site inspections relating to the removal of hazardous materials
- Business development to existing clients
- Maintain and enhance quality control within the group

What you bring to the Pinchin team:

- College diploma in Construction or Architectural Technology, or Bachelor of Science in Engineering or equivalent
- Entry level to two years of experience
- Hazardous Materials and Indoor Environmental Quality experience
- Related Post-secondary education an asset
- C.E.T. or related designations will be considered an asset
- Knowledge of environmental and health and safety legislation/guidelines
- Familiarity with building systems (structure, envelope, HVAC, electrical, plumbing etc.)
- Experience reading and interpreting architectural drawings
- Experience working with environmental monitoring equipment
- Strong communication and organizational skills with an ability to follow detailed instructions
- Excellent technical report writing skills
- Proficient with Microsoft Office Products
- Availability to work outside our core business hours and rotational weekends
- Vehicle, valid driver's license, and insurance as travel around the designated region is required
- There are times when employees are required by our clients to undergo security clearances and/or drug and alcohol testing to gain access to certain job sites

What's in it for you:

Of course, we offer competitive salaries and great benefits, but what makes Pinchin stand out from the crowd? Above all else, we care about our employees and the world around us! Our employees enjoy mentoring and career development programs, opportunities for community involvement including many environmental initiatives, a casual dress code, paid personal days, three weeks' paid vacation to start, reimbursement for association membership dues, a wellness spending account, social activities, team building events, corporate hotel rates and much more! All of this and more in an inclusive, dynamic work environment! Take a look to see all Pinchin has to offer: [Pinchin Benefits](#)

Please note that our recruitment process may involve online testing, depending on the position. As an employee of Pinchin, you will be required by our clients to undergo security clearances and, periodically, drug and alcohol testing in order to gain access to certain job sites. We thank all applicants for their interest in a career at Pinchin however, only those selected to continue will be contacted.

**** No agency phone calls please****

Why Pinchin?

At Pinchin, our employees are the heart of our business. If you're ready to build on your technical and project management skills, we have the resources and subject matter experts to support your career growth.
